

Ipswitch® Analytics

File Transfer Activity Monitoring and Reporting

Ensure reliable file transfers and improve end-to-end performance

Manage workflow, transfers and security activities from one console

Simplify compliance reporting by automating the generation and distribution of SLA, internal policy or audit reports

Ipswitch Analytics monitors and documents MOVEit® file transfer activities between employees, customers and partners. Whether you want to improve end-to-end performance and reliability, enable end-users to self-manage their file transfers, or reduce compliance costs, Ipswitch Analytics provides the insight you need.

Monitor file transfer activity and track performance.

Track MOVEit performance indicators such as failed transfers by end-point, peak load performance, and total throughput trends.

Automate report creation and distribution for SLA and policy compliance

Customize reports, establish distribution lists with fine-grained access control and schedule auto-generated reports for delivery. Email alerts are sent to authorized users as reports are generated.

Manage workflow, file transfer, security and audit activity in one place.

A single view of all MOVEit Transfer and MOVEit Automation servers activity. Manage key parameters for all file transfer processes such as transfer activity, user access, encryption, and file formatting.

Simplify the audit process.

Instantly validate all MOVEit activity with a single consolidated view. Create custom reports or use over 50 out-of-the-box templates. Drag-and-drop elements to organize presentation of key metrics to validate compliance with SLA, regulatory and corporate policies.

IPSWITCH ANALYTICS ARCHITECTURE

Ipswitch Analytics accesses and consolidates data from all MOVEit Transfer and MOVEit Automation servers via a co-located Ipswitch Analytics Server Agent. Authorized users monitor MOVEit activity in popular web browsers from any device. ▶

› INTERACTIVE ACTIVITY MONITOR

Key performance indicators are dynamically updated including, throughput, transfer outcomes, and automated tasks.

› REPORTING

Over 50 out-of-the-box templates to manage workflows, transfers, security and audits. Easy creation of reports by starting from pre-defined templates.

› ADVANCED SCHEDULER

Automate report generation, distribution, and notification based on defined schedules.

› ROLE-BASED ACCESS CONTROL

Administrators have fine-grained access control by assigning roles to each user. Roles limit access to features, such as ability to create custom reports, schedule report generation, or user access to reports. Roles include: Systems Administrator; Creator, Partner, and Reader.

› POLICY MANAGEMENT

Create policies to manage user access. Restrict user's ability to view data associated with defined organisations, servers, or users.

› VISIBILITY TO TRANSFERS VIA EXCHANGE

Investigate and compare secure vs non-secure file transfers occurring via Microsoft® Exchange

› LIGHTWEIGHT SERVER AGENT

Access and consolidate data from any MOVEit Transfer and MOVEit Automation servers via a co-located Ipswitch Analytics Server Agent.

› BROWSER-BASED UI

The Ipswitch Analytics HTML 5 interface allows dynamic update of data and offers a drag-and-drop user experience.

› VISUALIZATION TEMPLATES

Use pie charts, bar charts or time series charts to better gain insight to activity and performance data.

Monitor all file transfer activities from a single pane of glass

Graphically visualize data to quickly gain insights
